ABOUT DEANTA

We are not just another door company. We manufacture a wide range of beautifully designed stylish interior doors for the UK market. Our doors are made to the highest possible standard with only the finest materials and unsurpassed craftsmanship, ensuring you always get the best from your Deanta door. With over 20 years' experience in interior door design, manufacture and supply, Deanta has built a reputation for quality coupled with forward-thinking innovation.

OUR COMMITMENT TO QUALITY

Customer satisfaction is Deanta's highest priority. We achieve this by continuously pushing the boundaries to ensure that our products and services surpass the needs of our customers and inspire end-users.

As a UK manufacturer producing doors, glazing options and ancillary products in-house we are able to ensure high quality production and an uninterrupted, managed supply chain. We are confident that every Deanta door is expertly made from quality materials, ensuring you get the best from your contemporary Deanta door. Deanta only ever produce robust, solid core doors that are finished with specially selected crown cut and diamond cut veneers from North America. Our pre-finished black and white primed doors also feature solid cores providing extra strength and stability, making them the best in the UK market. With the largest solid lippings available in the UK internal door market, our doors can be adapted to fit into any size opening.

Our design team take inspiration from the latest interior design trends to create new, exciting styles to add to our ever-growing collection. And our rigorous testing procedures ensure that only the best doors make it to market.

OUR COMMITMENT TO SAFETY

Fire safety is at the core of our business. Deanta fire doors are extensively tested by independent third party certification schemes to ensure the maximum level of safety. All our fire doors are certified under the BM-TRADA Q-Mark scheme or have Certifire accreditation.

OUR COMMITMENT TO THE ENVIRONMENT

Our vision is to revolutionise the door industry and we have a strong set of beliefs that run through everything we do. We are passionate about protecting the environment – both our own and the bigger picture. To this end we are constantly pushing the boundaries to ensure that, as part of our corporate social responsibility, we develop ways to reduce, reuse and recycle the resources we use.

ARRIVING SUMMER, 2021

THE URBAN COLLECTION

The Urban Collection

The Urban Collection is our new range of industrial-style doors. It takes inspiration from the stripped back, lofty look of warehouses, factories and other industrial structures and features a range of four striking panelled door styles to bring the industrial design look to your home.

The Urban Collection consists of the Dalston, the Brixton, the Shoreditch and the Camden designs, available in a solid door to make a bold industrial statement or glazed versions for a lighter look. The Urban Collection is finished in strong black ready for installation, or white primed for a one-coat finish of your choice.

Hardware

The Urban Collection Hardware has been specifically designed to accessorise the Urban doors and accentuate the industrial look. Choose from three stylish handle designs available in solid black, satin brass or satin nickel and chrome polish finish. Accessorise further from the range of matching hinges and locks to get the perfect, on-trend industrial style door for any interior.

COLOUR FINISHING SERVICE

Hue by Déanta offers you the option to have any of our primed doors customised with our in-house painting service. Choose from a fantastic range of ten modern, bold and striking colours all of which have been carefully developed in line with current interior decorating trends.

This finishing service enables you to easily choose the right door and the right colour to match your home and your individual style.

Add a splash of colour with Hue by Deanta

The Hue by Deanta colour finishing service is available for any primed door in the Deanta range, including the new Urban Collection white primed doors, glazed doors and FD30 fire doors. Choose from our stunning range of 10 colours to find your perfect shade, to complement your home.

If making alterations to your Deanta door, you can use the Hue by Deanta touch-up pots to apply the same high quality paint to exposed edges to restore their original colour. Request a Hue swatch book to find your perfect colour.

NEW

GRAPHITE MIST PISTACHIO DUCK EGG MIDNIGHT IVORY MOCHA TRUFFLE BLACK

Available with any Urban Collection or feature white primed doors

New for 2021 - Graphite

We strive to be at the forefront of interior trends, and this stunning grey hue is perfect for a modern or contemporary home.

FOLDING SYSTEMS

Deanta Folding Systems offer flexible room divider solutions, allowing you to enjoy both large open-plan living areas and more intimate, segmented spaces. With a wide choice of door designs and finishes from the Deanta range and 12 opening configurations, a Deanta Folding System can be created to suit any home.

Folding Door Systems

Deanta Folding Systems can bring the flexibility to a property that is not always afforded by merely using walls to separate rooms. The flow of air and light into your living space can also be increased by combining Deanta's clear glazed internal doors within our folding systems.

Deanta's stylish room dividers are a complete off-the-shelf solution allowing you to quickly and easily install your chosen configuration. We have specially designed and rigorously tested the track and bearings to ensure they can withstand the solid, robust construction of a Deanta door, resulting in doors that effortlessly glide across the system every single time, and will last for years to come.

For further information visit our website at www.deanta.co.uk

SELECT OPENING WIDTH AND CONFIGURATION

OPENING WIDTH		CONFIGURATIONS		
610MM	686MM			
1295MM	1447MM		2 + 0	
1908MM	2136MM		3 + 0	
1908MM	2136MM		2 + 1	
2521MM	2825MM		2 + 2	
2521MM	2825MM		4 + 0	
2521MM	2825MM		3 + 1	

Please allow 10mm on outer frame width for recommended structural opening width.

Outer frame height can be adjusted between 2050mm and 2060mm dependent on flooring detail.

Linings are supplied oversize to allow them to be cut to suit.

CHOOSE YOUR DOOR

Deanta Folding Systems offer you the freedom to choose from a variety of doors from the Deanta range to achieve your desired look. The doors above are the most popular choices. We supply door linings in oak, walnut and white primed finishes to complement your door selection and complete the folding system.

Configuration: 3 + 0 | Featured door - Coventry white primed glazed

dēanta

POCKET DOORS

Deanta Pocket Door Systems can transform and maximise the space in your home. With space a premium inside the home, pocket doors are the ideal solution. Without the swing of the door, you have more room for furniture, the ability to create additional rooms, or simply to add some extra space.

Pocket doors are no longer used just for small cupboards or utility rooms. Create a feature with Deanta double pocket doors leading from a dining room to living room, or kitchen. Increase your space with this great feature and upgrade your interior.

Pocket Door Systems

Deanta Pocket Door Systems neatly conceal internal sliding doors within the wall cavity, creating a significant impact on both usable space and perceived available space. This increases flexibility and makes the room feel lighter and airier.

Designed to work in partition walls, each pocket door system comes with a pre-assembled aluminium track and header mechanism, allowing for stable and smooth sliding of the door along the track.

Deanta Pocket Door Systems are compatible with the majority of Deanta doors - including the NEW Urban Collection doors - and include all the necessary hardware. In particular, the door jambs included in the system, will provide the finishing touch that you need to conceal the sliding system.

Our pocket door system can be upgraded with add-ons such as a soft close, a self-closing kit or a bathroom lock.

For further information visit our website at www.deanta.co.uk

Features

- + Deanta Pocket Doors are recessed straight into a partition wall
- + Under door profile for stable and smooth sliding of the door
- + Round flush pull handle with a satin chrome or black finish

BATWING®
acoustic + smoke seal

Features unique curved fins made from flexible elastometric material for performance and durability. Installed at the head and jambs of single and double leaf doors.

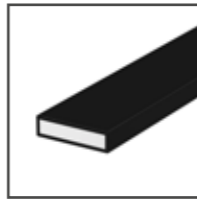

LAS8001 SI
Drop Seal

Aluminium based drop seal for acoustic, smoke and energy containment. Features a high efficiency mechanism which lifts the seal clear of the floor as soon as the door is opened. Fitted onto single swing doors, for use on both right and left-handed doors.

DS
acoustic, smoke + fire seal

DS door seal offers the ultimate in acoustic, smoke + fire protection, with the added benefit of thermal containment.

DS
fire seal

Fire door seals offer the ultimate in fire protection where no smoke sealing is required - or with an additional smoke and acoustic seal such as Batwing®.

dēanta
— ARCHITECTURAL —

Premium flush doors available in nine finishes. Complete your door with unlimited aperture styles, five glazing options, hardware, skirting & architrave and fire and acoustic seals.

Deanta Architectural Doors

Our Architectural range offers our customers an extensive choice of internal doors, aperture options and glazing types providing maximum flexibility when creating their ideal door.

All customisations to our doors - aperture cutting and glass fitting - are completed in our very own specialist Joinery & Glazing Centre in Cambridgeshire. This service allows us to significantly cut down the lead time for glazing, ensuring that project deadlines are met and the product is delivered with the exceptional quality that our customers have come to expect from Deanta.

Please note: All doors in the Architectural range feature 6mm lippings.

Certification

Certifire is a UKAS accredited, independent third-party product certification scheme operated by Warringtonfire Testing and Certification Limited. FD30 doors certified to the Certifire scheme are clearly identified as such on each product page.

All of our Deanta Architectural doors are FSC® certified, guaranteeing the timber is harvested in a way that maintains forests' biodiversity, productivity and ecological processes.

Bespoke Doors

Your door. Your size. Your style. Our pleasure.

Choose a bespoke size of any door in this brochure or even design your perfect door and our skilled craftsmen will bring your ideas to life.

Simply follow our four steps to get your perfect door.

Please visit our website at: deantabespoke.co.uk for more information.

dēanta
— BESPOKE —

STEP 1

Contact your local stockist with your request

STEP 2

Once we receive your enquiry you will be sent a quotation and lead time

STEP 3

You will receive a technical drawing and once we receive your approval, your door will go into production and lead time confirmed

STEP 4

Your bespoke doors are delivered direct to your home

Bespoke Glazing Service

Bespoke glazing is available for a number of the doors in this brochure. The doors are cut and glazed in our glazing centre right here in Cambridgeshire with a lead time of three to four weeks.

Design

Choose your aperture size and configuration and select from a range of glazing types. The bespoke glazing service is available for regular glazing and fire glazing.

Choice

Choose from fifteen specially selected doors and unlimited aperture options. The doors that are able to be customised are identified on the product pages.

Certification

We extensively test our product range through independent, third-party certification schemes. These accreditations are detailed on the opposite page.

Certification

Certifire is a UKAS accredited, independent third-party product certification scheme operated by Warringtonfire Testing and Certification Limited. FD30 doors certified to the Certifire scheme are clearly identified as such on each product page. Additionally, all of our fire doors are Q-Mark approved.

A number of our aperture options are compliant with Approved Document M: Access to and use of buildings, Part K6. Compliant options are highlighted below.

GLAZING OPTIONS

Choose from standard non fire-rated glass to 30 minute and 60 minute fire-rated with wired options. We are proud stockists of Pilkington. We use Pyorodur® and Pyoroshield™ glass in all our bespoke glazed fire doors. We can also supply 30 minute satin fire-rated glass upon request.

The highlighted doors comply with *Approved Document M: Access to and use of buildings*

Fire Safety

Fire safety is at the core of our business. Because we manufacture all of our own doors, we can ensure that every single component, not only meets the required standards, but exceeds them. We invest heavily in research and development to provide you with the safest, most reliable fire door products on the market.

All our fire-rated products are extensively tested and accredited by third party certification schemes. Every 30-minute fire door (FD30 doors) in our collection is certified by the BM TRADA Q-Mark and/or Certifire scheme. The relevant third-party certifications are indicated on the individual product pages of this brochure.

BM TRADA Q-Mark

The BM TRADA Q-Mark scheme is based on the recognised Product Certification Standard EN ISO/ICE 17065 and confirms that a product conforms to the requirements of an appropriate recognised product Scheme Technical Document. BM TRADA Q-Mark products feature a plug identifying them as such.

The plug to identify a Q-Mark accredited product will be located on the top of the door.

Outer colour – indicates the period of fire integrity e.g. 30, 60, 90 or up to 120 minutes of fire protection.

Deanta is an approved door leaf and/or frame manufacturer (only valid for FD30 & FD60 doors) which is indicated by the red inner colour.

The number located in the centre is the unique certified company number.

Certifire

Certifire is a UKAS accredited, independent third-party product certification scheme operated by Warringtonfire Testing and Certification Limited. FD30 doors certified to the Certifire scheme are clearly identified as such on each product page.

All Certifire accredited products carry a unique label on the top edge of the door. A Certifire CF5740 Data Sheet will be provided with every purchase of a Certifire accredited door.

Being Responsible

At Deanta we want to provide the best products without compromising on our commitment to ensure sustainability throughout our supply chain and to our environmental responsibilities. We are focused on reducing our carbon footprint, helping to protect our planet, and ensuring we have a positive impact on our society, economy, and the environment. At Deanta we have implemented many schemes to achieve this commitment.

At a time where there is continued depletion of natural resources it is our responsibility to ensure that we are using timber from forests that use best practice and recognised schemes to maintain forest biodiversity, productivity and ecological processes as well as protecting the rights of the local people.

FSC®

We are certified by the Forest Stewardship Council® (FSC®) and all our prefinished products are made using FSC® Certified materials and this is indicated on the individual product pages of this brochure. For products which do not currently carry FSC® certification we are able to trace the timber to managed forests ensuring that we are providing products that are sustainably sourced.

We have sensor lighting throughout our site to ensure that no power is wasted when not in use.

We are certified by the Forest Stewardship Council® (FSC®)

98% of all our onsite waste is recycled.

We use mains water dispensers to reduce the use of plastic bottles and help the environment.

The solar panels on our building create enough energy to make our building self-sustainable for seven months.

Our site is fitted with electric charging ports. Where possible new company vehicles will either be hybrid or fully electric engines.

Important Information

We offer a limited ten year warranty on all our doors. Any Deanta door that warps* or splits will be covered by our warranty once the installation has met all guidelines. Please note colour variance in the wood is not considered a manufacturing fault as it is a natural product.

THE FOLLOWING MUST BE CARRIED OUT TO ENSURE THE BEST PERFORMANCE FROM YOUR DEANTA DOOR

- All doors must be examined immediately on receipt and prior to installation as claims or faults will not be accepted once the door has been installed or altered. This excludes manufacturing faults that occur after hanging.
- Doors must be stored horizontally on a clean, dry, flat and level surface.
- Doors must not be fitted in a house that is freshly plastered and doors should only be delivered to site after all wet trades are finished and sufficiently dried. A moisture reading taken by an engineer must be recorded.
- For doors to acclimatise, they should be left in the house prior to installation for at least seven days with the ambient temperature gradually increased over this period.
- Should a door require alteration, cutting or planing, it must be immediately revarnished to prevent moisture absorption which may lead to warping or splitting.
- Take no more than 32mm** off the width and height of doors in equal amounts on all edges.
- Planed edges of prefinished doors must be refinished using three coats of internal wood finish.
- Three coats of internal wood finish are required on unfinished doors and on any modifications to a prefinished door including the ironmongery and hinge cut-outs.
- We recommend the use of three hinges per door.
- We recommend varnish and lacquers that are suitable for interior joinery. If using oils please contact Deanta for recommended brands.
- Ten year warranty on hardware (handles and locks) refers to mechanical faults. General wear and tear from use is not covered by this warranty.

UNDER OUR WARRANTY, OUR LIABILITY IS LIMITED TO REPLACING THE DOOR AND NO LIABILITY IS ACCEPTED FOR ANY CONSEQUENTIAL COSTS. ALTERATION OF A DEANTA DOOR WILL VOID THE WARRANTY.

* Warp/bow/cup/twist (as set out in the relevant British Standard) shall not be considered a defect unless it exceeds 1/4 inch (6.35mm) in the plane of the door itself. Warp is any distortion in the door itself and does not refer to the relationship of the door to the frame or jamb in which it is hung.

** Refer to our website for details on trimming fire doors.
